

# Disaster Management Project

## Introduction

Disaster management involves organizing resources and responsibilities to deal with all aspects of emergencies, in particular preparedness, response, and recovery to lessen the impact of disasters.

## Types of Disasters

1. Natural Disasters: Earthquakes, Floods, Cyclones, Droughts, Tsunamis, etc.
2. Man-made Disasters: Fires, Industrial Accidents, Nuclear Explosions, Terrorist Attacks, etc.

## Phases of Disaster Management

1. Mitigation: Steps to prevent or reduce the impact of disasters.
2. Preparedness: Planning how to respond.
3. Response: Immediate action taken during and after disasters.
4. Recovery: Restoring affected areas to their original state.

## Creative Ideas

- Making 3D models showing disaster zones.
- Using charts and infographics to explain disaster types.
- Creating a mobile app interface concept for emergency alerts.
- Interactive quiz or games for awareness.

## Knowledge Tips

- Stay informed through news and official alerts.
- Create an emergency supply kit.

# Disaster Management Project

- Know the evacuation routes in your area.
- Participate in drills and training programs.

## Conclusion

Effective disaster management saves lives, reduces damage, and helps communities recover faster.

Awareness, preparedness, and education are key to minimizing disaster risks.
